

OUR MISSION

To advance the vehicle service industry by providing technical data and open dialog between the manufacturers and users of transportation products and the providers of tools, equipment, and service information.

ABOUT ETI

The Equipment and Tool Institute has been a strong advocate for the automotive aftermarket since its inception in 1947. Today at ETI, we exemplify unparalleled networking between our member companies and automotive manufacturers.

VALUES

- To advance the productivity, profitability, and growth of the automotive service industry
- To facilitate collaboration between the auto makers and the aftermarket

MEMBERSHIP BENEFITS

- Access to diagnostic technical data and repair information
- Product marketing guidance
- Superior automotive industry networking & member events
- Feedback from users to manufacturers, promoting product improvement

MEETINGS & EVENTS

ToolTech

Focuses on automotive related tool and equipment companies. OEM and industry leader presentations, discussion groups, One-on-One meetings, and Company Spotlight Tradeshow.

Summer and Winter Tech Weeks

ETI member company engineers and product managers meet directly with vehicle manufacturer service representatives and engineers. Discussion on new systems, technology, and specifications for future models.

SERVICES

TEK-NET Library

An invaluable, up to date repository of past and current diagnostic data

Market Research

Assistance in bringing new and improved equipment and tools to the marketplace

Social Media, Website and Newsletter

Publish your current news
